The prediction of oil recovery by waterflooding. Resource poor farmers may fear loss of land and also investment made owing to inability to cultivate the land as a result of labour shortage.

Meanwhile, the US Central Bank made sure that short term interest rates never During the long boom of the first postwar quarter century, as profitability remained high and economic growth rapid, state budget surpluses -- not deficits--were the norm in western Europe and Japan, and even in the US government deficits were

minimal. The project design did not set out a plan to operationalise the targeting criteria to select those households that should benefit from the project. Nevertheless, as noted earlier, from the start of onwards, East Asian governments, led by Japan and China, countered the outflow of funds by making record-breaking purchases of dollar-denominated assets.

The project's intention of developing farmer organisations in their irrigation systems was a key objective of the project. The project's Financial Analyst and Dr M.
