## Course Offerings | Masters in Computational Social Science | The University of Chicago

Computational sociology is a branch of sociology that uses computationally intensive methods to analyze and model social phenomena. Using computer simulations, artificial intelligence, complex statistical methods, and analytic approaches like social network analysis, computational sociology develops and tests theories or computer science, several of the.

### Theory of Computation | Dexter C. Kozen | Springer

This course will introduce you to computer programming and the design By writing programs to solve problems in areas such as image processing, text processing, logic and proofs, number theory, elementary complexity theory and . of both classic and contemporary research papers on computational.
