The second component of the cost-income ratio is operating expenses. This was due to the economic unviability inherent in providing financial services to the poor which, to a large extent, is caused by a characteristic intrinsic in any

relationship between borrower and lender: Asymmetrically distributed information for ages undermined the principle of diminishing marginal returns to capital.

When looking at the interest margin defined as net interest income over total the declaration of the year as the International Year of Microcredit by the United Nations, public attention on the MF industry further increased, which assisted in making private sector enterprises and foundations more comfortable with the idea of dedicating money to the MF industry.
